Biotechnology and Bioengineering

Volumes 35 and 36, 1990

January 1990

January 5, 1990

Cell Counting and Carbon Utilization Velocities via Microbial Calorimetry
Irwin Boe and Rex Lovrien 1

Fast Inferential Adaptive Optimization of a Continuous Yeast Culture Based on Carbon Dioxide Evolution Rate
Yong K. Chang and Henry C. Lim 8

Integral Kinetics of β-Galactosidase Purified from *Glycine max* for Simultaneous Hydrolysis of Stachyose and Raffinose
Jill E. Porter, Klaus M. Herrmann, and Michael R. Ladisch 15

Cellular Plasmid Content and Cloned-Gene Expression: Some Useful Equations
Vasuki N. Satyagal and Pramod Agrawal 23

A Population Balance Model of Enzymatic Lysis of Microbial Cells
J.B. Hunter and J.A. Asenjo 31

Oxygen Transfer Rates in a Mammalian Cell Culture Bioreactor Equipped with a Cell-Lift Impeller
M. Johnson, G. André, C. Chavarie, and J. Archambault 43

Optimization of Sulphur Production in a Biotechnological Sulphide-Removing Reactor
Cees J.N. Buisman, Bert G. Geraats, Peter Ijspeert, and Gatze Lettinga 50

Structure of Activated Sludge Flocs
Da-hong Li and Jerzy J. Ganczarczyk 57

Encapsulation of Mammalian Cell with Chitosan–CMC Capsule
Toshimitsu Yoshioka, Ryogo Hirano, Toshiaki Shioya, and Masatoshi Kako 66

In Situ Methane Enrichment in Anaerobic Digestion
T.D. Hayes, H.R. Isaacson, J.T. Pfeffer, and Y.M. Liu 73

Isolation of Urokinase by Affinity Ultrafiltration
K.B. Male, A.L. Nguyen, and J.H.T. Luong 87

Communications to the Editor

An Active Insoluble Aggregate of *E. coli* β-Galactosidase
S.K. Khare and M.N. Gupta 94

Kinetics of Growth and α-Amylase Production of Immobilized *Bacillus subtilis* in an Airlift Bioreactor
Yong Guo, Fei Lou, Zhi-Ying Peng, Zhen-Yuan Yuan, and Roger A. Korus 99

In Situ Glucose Monitoring in Fermentation Broth by "Sandwiched" Glucose-Oxidase Electrode (SGE)
J. Rishpon, Y. Shabtai, I. Rosen, Y. Zibenberg, R. Tor, and A. Freeman 103

January 20, 1990

Reasons of the Apparent Difference in the Effects of Produced and Added Ethanol on Culture Viability during Rapid Fermentations by *Saccharomyces cerevisiae*
G. Desari, M.A. Worth, M.A. Connor, and N.B. Pamment 109

Separation of L-Valine from Fermentation Broths Using a Supported Liquid Membrane
P. Deblay, M. Minier, and H. Renon 123

Lipolytic Activities of a Lipase Immobilized on Six Selected Supporting Materials
Jei-Fu Shaw, Rey-Chang Chang, Fung Fang Wang, and Yng Jiin Wang 132

A Model for Energy-Sufficient Culture Growth
S.P. Tsai and Y.H. Lee 138

Adsorption Equilibrium in Immunoaffinity Chromatography with Antibodies to Synthetic Peptides
Akihiko Kondo, Hiroyuki Takamatsu, Shigeo Katoh, and Eizo Sada 146

Immobilization of *Arthrobacter simplex* in a Thermally Reversible Hydrogel: Effect of Temperature Cycling on Steroid Conversion
Tae Gwan Park and Allan S. Hoffman 152

A Mathematical Model for Examining Growth and Sporulation Processes of *Bacillus subtilis*
J.W. Jeong, J. Snay, and M.M. Ataai 160

Dynamic Analysis of Genetic Control and Regulation of Amino Acid Synthesis: The Tryptophan Operon in *Escherichia coli*
Asok K. Sen and Wei-min Liu 185

Production of Glycerides from Glycerol and Fatty Acid by Immobilized Lipases in Non-aqueous Media
F. Ergan, M. Trani, and G. André 195

Determination of Maintenance Coefficients of *Saccharomyces cerevisiae* Cultures with Cell Recycle by Cross-Flow Membrane Filtration
Jean-Louis Uribelarrea, Jacques Winter, Gérard Goma, and Alain Pareilleux 201

Communications to the Editor

Ballistic Disintegration of Microorganisms in Laboratory Disintegrator of New Type ML-1
L. Ya. Shestakovsky 207

Production of Cellulase on Mixtures of Xylose and Cellulose in a Fed-Batch Process
Ali Mohagheghi, Karel Grohmann, and Charles E. Wyman 211

February 1990

February 5, 1990

Adaptive Predictive Control of a Multistage Fermentation Process
P. Vigié, G. Goma, P.Y. Renaud, G. Chamilothoris, B. Dahhou, and J.B. Pourciel 217

On the Coexistence of Competing Microbial Species in a Chemostat under Cycling
S. Pavlou, I. G. Kevrekidis, and G. Lyberatos 224

A Modeling Study of Carbon and Light Limitation in Algal Biofilms
S. K. Liehr, M. T. Suidan, and J. W. Eheart 233

Production, Purification, and Characterization of Xylanase from a Hyperxylanolytic Mutant of *Aspergillus ochraceus*
S. R. Biswas, S. C. Jana, A. K. Mishra, and G. Nanda 244

Optimal Temperature Control for a Structured Model of Plant Cell Culture
C. M. Bailey and H. Nicholson 252

The Use of a Single-Fiber Reactor for the Enzymatic Removal of Amino Acids from Solutions
S. R. Reiken and D. M. Briedis 260

Alcohol Adsorption on Softwood Lignin from Aqueous Solutions
Y. Yang, M. R. Ladisch, and C. M. Ladisch 268

Diffusion of Phenol through a Biofilm Grown on Activated Carbon Particles in a Draft-Tube Three-Phase Fluidized-Bed Bioreactor
L.-S. Fan, R. Leyva-Ramos, K. D. Wisecarver, and B. J. Zehner 279

Effect of Operating Parameters on Specific Production Rate of a Cloned-Gene Product and Performance of Recombinant Fermentation Process
S. Park and D. D. Y. Ryu 287

Cultivation of Plant Cells in a Stirred Vessel: Effect of Impeller Design
B. S. Hooker, J. M. Lee, and G. An 296

Communications to the Editor

Determination of Growth Rate for Plant Cell Cultures: Comparative Studies
D. D. Y. Ryu, S. O. Lee, and R. J. Romani 305

Glucose-Limited Fed-Batch Cultivation of *Escherichia coli* with Computer-Controlled Fixed Growth Rate
T. Paalme, K. Tiisma, A. Kahru, K. Vanatalu, and R. Vilu 312

Mechanism of Biosorption of Copper(II) by *Ganoderma lucidum*
T. R. Muraleedharan and C. Venkobachar 320

February 20, 1990

Prediction of Diffusion Coefficients of Proteins
M. T. Tyn and T. W. Gusek 327

A Process for the Production of Human Proinsulin in *Saccharomyces cerevisiae*
H. V. Tøttrup and S. Carlsen 339

Optimal Control of Biomass Growth in a Mixed Culture
V. Van Breusegem and G. Bastin 349

A Mathematical Description of Recombinant Yeast
S. J. Coppella and P. Dhurjati 356

Modeling Analysis of an Intercalated-Spiral Alternate-Dead-Ended Hollow Fiber Bioreactor for Mammalian Cell Cultures
J. D. Brotherton and P. C. Chau 375

Comparison of Wild-Type and *Reg 1 Mutant Saccharomyces cerevisiae* Metabolic Levels During Glucose and Galactose Metabolism Using ^{31}P NMR
J. V. Shanks and J. E. Bailey 395

Vancomycin Partitioning in Aqueous Two-Phase Systems: Effects of pH, Salts, and an Affinity Ligand
C.-K. Lee and S. I. Sandler 408

On-Line Optimization of Biotechnological Processes: I. Application to Open Algal Pond
H. Guterman and S. Ben-Yaakov 417

Mechanism of Enhanced Oxygen Transfer in Fermentation Using Emulsified Oxygen-Vectors
J. L. Rols, J. S. Condoret, C. Fonade, and G. Goma 427

March 1990

March 5, 1990

Approximation of Continuous Fermentation by Semicontinuous Cultures
P. J. Westgate and A. H. Emery 437

Effects of Temperature on Cell Growth and Xanthan Production in Batch Cultures of *Xanthomonas campestris*
C.-H. Shu and S. T. Yang 454

The Loss of Antibody Productivity in Continuous Culture of Hybridoma Cells
K. K. Frame and W.-S. Hu 469

A Thermodynamic Model to Predict *Phanerochaete chrysosporium* INA-12 Adhesion to Various Solid Carriers in Relation to Lignin Peroxidase Production
M. Asther, M.-N. Bellon-Fontaine, C. Capdevila, and G. Corrieu 477

Mass Transfer Phenomena in an Airlift Reactor: Effects of Solids Loading and Temperature
B. C. Smith and D. R. Skidmore 483

Continuous Measurement of Dissolved H_2 in an Anaerobic Reactor Using a New Hydrogen/Air Fuel Cell Detector
A. Pauss, R. Samson, S. Guiot, and C. Beauchemin 492

Effect of Biofilm Growth on Steady-State Biofilm Models
C. T. Skowlund 502

An ESR Study of Spin-Labeled Silk Fibroin Membranes and Spin-Labeled Glucose Oxidase Immobilized in Silk Fibroin Membranes
T. Asakura, H. Yoshimizu, and M. Kakizaki 511

Protease Immobilization onto Polyacrolein Microspheres
T. Hayashi and Y. Ikada 518

Mathematical Modeling of a Single-Cell Enzyme Assay
K. D. Wittrup and J. E. Bailey 525

Microbial Control of the Production of Hydrogen Sulfide by Sulfate-Reducing Bacteria
A. D. Montgomery, M. J. McInerney, and K. L. Sublette 533

Liquid Circulation in External-Loop Airlift Bioreactors
Y. Kawase 540

March 15, 1990

Kinetic Model for Microbial Uptake of Insoluble Solid-State Substrate
S.-Y. Huang and M.-S. Chou 547

Asymmetric Reduction of Ketones with Resting Cells of *Sulfolobus solfataricus*
A. Trincone, L. Lama, V. Lanzotti, B. Nicolaus, M. De Rosa, M. Rossi, and A. Gambacorta 559

Propagation of an Amplifiable Recombinant Plasmid in *Saccharomyces cerevisiae:* Flow Cytometry Studies and Segregated Modeling
K.D. Witrup, J.E. Bailey, B. Ratzkin, and A. Patel 565

Oxygen Transfer Enhancement in Aqueous/Perfluorocarbon Fermentation Systems. I: Experimental Observations
B.H. Junker, T.A. Hatton, and D.I.C. Wang 578

Oxygen Transfer Enhancement in Aqueous/Perfluorocarbon Fermentation Systems. II: Theoretical Analysis
B.H. Junker, D.I.C. Wang, and T.A. Hatton 586

Drying of Ethanol Vapors by Adsorption on Corn Meal
A.A. Hassaballah and J.H. Hills 598

Immobilized Cell Biocatalyst Activation and Pseudo-Steady-State Behavior: Model and Experiment
H.G. Monbouquette, G.D. Sayles, and D.F. Ollis 609

Comparison of the Simultaneous Wet Milling and Enzymatic Hydrolysis of Cellulose in Ball Mill and Attrition Mill Reactors
P.W. Furcht and H. Sila 630

Communications to the Editor

Immobilization of Biocatalysts by Photochemically Grafted Membranes: Some Studies with Catalase as Model System
I.R. Bellobono, E. Selli, A. Polissi, and F. Muffato 646

Stability of Two Novel Serine Proteinases in Commercial Laundry Detergent Formulations
B.B. Samal, B. Karan, and Y. Stabinsky 650

March 25, 1990

Multipoint Attachment to a Support Protects Enzyme from Inactivation by Organic Solvents: α-Chymotrypsin in Aqueous Solutions of Alcohols and Diols
V.V. Mozhaev, M.V. Sergeeva, A.B. Belova, and Y.L. Khmelnitsky 653

Production of Indole Alkaloids by Surface Immobilized *C. Roseus* Cells
J. Archambault, B. Volesky, and W.G.W. Kurz 660

Plasmid-Encoded Protein: The Principal Factor in the "Metabolic Burden" Associated with Recombinant Bacteria
W.E. Bentley, N. Mirjalili, D.C. Andersen, R.H. Davis, and D.S. Kompala 668

A Mathematical Model for Metal Affinity Protein Partitioning
S.-S. Suh and F.H. Arnold 682

Solvent Selection for Biocatalysis in Mainly Organic Systems: Predictions of Effects on Equilibrium Position
P. J. Halling 691

Development of Bioreactors for the Culture of Surface Immobilized Plant Cells
J. Archambault, B. Volesky, and W. G. W. Kurz 702

Dynamic On-Line Optimization of a Bioreactor
J. N. Petersen and G. A. Whyatt 712

Enzyme Production by Genetically Engineered *Streptomyces* Strains: Influence of Culture Conditions
T. Erpicum, B. Granier, M. Delcour, V. M. Lenzini, M. Nguyen-Distèche, Jean Dusart, and J.-M. Frère 719

Optimum pH and Temperature Conditions for Xylose Fermentation by *Pichia stipitis*
P. J. Slininger, R. J. Bothast, M. R. Ladisch, and M. R. Okos 727

Simple Constrained-Optimization View of Acetate Overflow in *E. coli*
R. A. Majewski and M. M. Domach 732

Development of a Biosensor for Assaying Postmortem Nucleotide Degradation in Fish Tissues
A. Mulchandani, K. B. Male, and J. H. T. Luong 739

On Performing Experimental Studies on Transient States of Continuous-Flow Methanogenic Reactors
A. J. DeLorme and R. B. Kapuscinski 746

Erratum 751

April 1990

April 5, 1990

Production of Emulsan in a Fermentation Process Using Soybean Oil (SBO) in a Carbon–Nitrogen Coordinated Feed
Y. Shabtai and D. I. C. Wang 753

Critical Assessment of the Steady-State Na_2SO_3 Feeding Method k_la Measurement in Fermentors
V. Linek, B. Beneš, and J. Sinkule 766

Use of Regulated Secretion in Protein Production from Animal Cells: An Evaluation with the AtT-20 Model Cell Line
A. Sambanis, G. Stephanopoulos, A. J. Sinskey, and H. F. Lodish 771

Kinetics of Carrot Somatic Embryo Development in Suspension Culture
D. L. Cazzulino, H. Pedersen, C.-K. Chin, and D. Styer 781

Detection of Microbial Contamination in Fermentation Processes: Mass Spectrometric Determination of Gram-Negative Bacteria in *Leuconostoc mesenteroides* Cultures
I. Elmroth, A. Valeur, G. Odham, and L. Larsson 787

Esterification Reactions of Lipase in Reverse Micelles
D. G. Hayes and E. Gulari 793

Heat Transfer Simulation in Solid Substrate Fermentation
G. Saucedo-Castañeda, M. Gutiérrez-Rojas, G. Bacquet, M. Raimbault, and G. Viniegra-González 802

A Macromodel for Outdoor Algal Mass Production
H. Guterman, A. Vonshak, and S. Ben-Yaakov 809

A Mathematical Model for the Growth of Mycelial Fungi in Submerged Culture
M. Aynsley, A.C. Ward, and A.R. Wright 820

Functional Properties of Hemoglobin Immobilized in Coacervates Prepared from Gelatin A and Polyanionic Carbohydrates
M. Brouwer, R. Cashon, and J. Bonaventura 831

Communications to the Editor

Analysis of Hollow Fiber Bioreactor Wastewater Treatment
L. Dall-Bauman, S. Ilias, and R. Govind 837

Growth of Tumor Cells within Microporous Hollow Fibers: An In Vitro Model System for Studies of Immunoprotein Transport
T.R. Shockley and M.L. Yarmush 843

An Improvement in Stability of Oxygen Microprobe
J.Y. Kim and Y.H. Lee 850

April 15, 1990

A Liquid Emulsion Membrane Process for the Separation of Amino Acids
H. Itoh, M.P. Thien, T.A. Hatton, and D.I.C. Wang 853

Extractive Acetonobutylic Fermentation by Coupling Ultrafiltration and Distillation
M. Minier, R. Grateloup, E. Blanc-Ferras, and G. Goma 861

Morphological Measurements on Filamentous Microorganisms by Fully Automatic Image Analysis
H.L. Packer and C.R. Thomas 870

Bovine Colostrum or Milk as a Serum Substitute for the Cultivation of a Mouse Hybridoma
O.T. Ramírez, G.K. Sureshkumar, and R. Mutharasan 882

Pellet Formation and Cellular Aggregation in *Streptomyces tendae*
S.E. Vecht-Lifshitz, S. Magdassi, and S. Braun 890

Mathematical Modeling of the Effects of Ammonium Ion on the Intracellular pH of Hybridoma Cells
A. McQueen and J.E. Bailey 897

A General Model for Aerobic Yeast Growth: Batch Growth
J.P. Barford 907

A General Model for Aerobic Yeast Growth: Continuous Culture
J.P. Barford 921

Chemometric Optimization of an Asymmetric Reduction Catalyzed by Baker's Yeast
E. Boccù, C. Ebert, L. Gardossi, T. Gianferrara, and P. Linda 928

Electrochemical Regeneration of NAD in a Plug-Flow Reactor
A. Fassouane, J.-M. Laval, J. Moiroux, and C. Bourdillon 935

Effects of Stirring and Sparging on Cultured Hybridoma Cells
A.R. Gardner, J.L. Gainer, and D.J. Kirwan 940

Communications to the Editor

Causes of Emulsion Formation during Solvent Extraction of Fermentation Broths and its Reduction by Surfactants
S. Lennie, P.J. Halling, and G. Bell 948

Biological Removal of Toxic Chromium Using an *Enterobacter cloacae* Strain that Reduces Chromate under Anaerobic Conditions
K. Komori, A. Rivas, K. Toda, and H. Ohtake 951

April 25, 1990

Protein Refolding in Reversed Micelles
A.J. Hagen, T. Alan Hatton, and D.I.C. Wang 955

Protein Refolding in Reversed Micelles: Interactions of the Protein with Micelle Components
A.J. Hagen, T. Alan Hatton, and D.I.C. Wang 966

Enzyme Loading in a Solid Support with Nonuniform Pore Size Distribution
C.L. Chiang, T.C. Wu, and Y.J. Wang 976

Batch and Continuous Cultivation of *Pseudomonas fluorescens* at Increased Pressure
U. Onken 983

Ecoengineering High Rate Anaerobic Digestion Systems: Analysis of Improved Syntrophic Biomethanation Catalysts
J.H. Thiele, W.-M. Wu, M.K. Jain, and J.G. Zeikus 990

New Method of Immobilization of Microbial Cells by Capture on the Surface of Insoluble Pyridinium-Type Resin
N. Kawabata, S. Nishimura, and T. Yoshimura 1000

Invertase-Catalyzed Reactions in Alcoholic Solutions
B. Selisko, R. Ulbrich, A. Schellenberger, and U. Müller 1006

The Effect of Agitation on the Morphology and Penicillin Production of *Penicillium chrysogenum*
J.J. Smith, M.D. Lilly, and R.I. Fox 1011

Effects of Spatial Heterogeneity on the Dynamics of a Microbial Feeding Interaction
E. Tsangaropoulou and S. Pavlou 1024

Comments on Validity of Dynamic Measuring Methods of Oxygen Diffusion Coefficients in Fermentation Media with Polarographic Oxygen Electrodes
V. Linek and J. Sinkule 1034

Hollow Fiber Supported Gas Membrane for In Situ Removal of Ammonium During an Antibiotic Fermentation
V. Hecht, L. Bischoff, and K. Gerth 1042

Communications to the Editor

Lysine and Other Diamines Dramatically Stabilize Poliovirus against Thermoinactivation
B.L. Dorval, M. Chow, and A.M. Klibanov 1051

Asymptomatic Relations for Preparative Gradient Elution Chromatography of Biomolecules
D.D. Frey 1055

May 1990

Effect of Ammonium Ion and Extracellular pH on Hybridoma Cell Metabolism and Antibody Production
A. McQueen and J.E. Bailey 1067

Use of an Oxygen Microsensor for the Determination of Intrinsic Kinetic Parameters of an Immobilized Oxygen Reducing Enzyme
C.M. Hooijmans, S.G.M. Geraats, and K.Ch.A.M. Luyben 1078

Development of a Strategy to Control the Dissolved Concentrations of Oxygen and Carbon Dioxide at Constant Shear in a Plant Cell Bioreactor
J.M. Smith, S.W. Davison, and G.F. Payne 1088

Elucidation of the Cytoplasmic and Vacuolar Components in the Inorganic Phosphate Region in the ^{31}P NMR Spectrum of Yeast
J.V. Shanks and J.E. Bailey 1102

Oxygen and Carbon Dioxide Mass Transfer and the Aerobic, Autotrophic Cultivation of Moderate and Extreme Thermophiles: A Case Study Related to the Microbial Desulfurization of Coal
F.C. Boogerd, P. Bos, J.G. Kuenen, J.J. Heijnen, and R.G.J.M. van der Lans 1111

Production of *S*-Adenosyl-L-Methionine by *Saccharomyces cerevisiae* Cells Carrying a Gene for Ethionine Resistance
N. Shiomi, H. Fukuda, Y. Fukuda, K. Murata, and A. Kimura 1120

Degradation Kinetics of Pentachlorophenol by *Phanerochaete chrysosporium*
J.-E. Lin, H.Y. Wang, and R.F. Hickey 1125

Increased Mass Transfer to Microorganisms with Fluid Motion
B.E. Logan and J.W. Dettmer 1135

Studies on the Deactivation of Immobilized Urease
P.T. Vasudevan, L. Ruggiano, and R.H. Weiland 1145

Oxidation of Hydrogen Sulfide by Thiobacilli
P. Cadenhead and K.L. Sublette 1150

Air-Bubbling, Hollow-Fiber Reactor with Cell Bleeding and Cross-Flow Filtration
K. Nishii, K. Sode, and I. Karube 1155

Communications to the Editor

On the First-Order Approximation to the Response of Dissolved Oxygen Electrodes for Dynamic K_La Estimation
J.C. Merchuk, S. Yona, M.H. Siegel, and A. Ben Zvi 1161

Comparison of Intracellular Sugar-Phosphate Levels from ^{31}P NMR Spectroscopy of Intact Cells and Cell-Free Extracts
J.L. Galazzo, J.V. Shanks, and J.E. Bailey 1164

Quantitative Assay for Low Levels of L-Threonine in Amino Acid Fermentation Broths
R.D. Kiss, G. Stephanopoulos, and M.T. Follettie 1169

June 1990

June 5, 1990

1 Production of Recombinant Human Growth Hormone in *Escherichia coli:* Expression of Different Precursors and Physiological Effects of Glucose, Acetate, and Salts
E. B. Jensen and S. Carlsen

12 Action Pattern of Alpha-Amylase from *Aspergillus oryzae* in Concentrated Media
M. Graber and D. Combes

19 Oscillatory Behavior of *Saccharomyces cerevisiae* in Continuous Culture: I. Effects of pH and Nitrogen Levels
C. I. Chen, K. A. McDonald, and L. Bisson

28 Oscillatory Behavior of *Saccharomyces cerevisiae* in Continuous Culture: II. Analysis of Cell Synchronization and Metabolism
C. I. Chen and K. A. McDonald

39 Formation of C–C Bonds by Mandelonitrile Lyase in Organic Solvents
E. Wehtje, P. Adlercreutz, and B. Mattiasson

47 Production of L-Phenylacetyl Carbinol by Immobilized Yeast Cells: I. Batch Fermentation
W. M. Mahmoud, A.-H. M. M. El-Sayed, and R. W. Coughlin

55 Production of L-Phenylacetyl Carbinol by Immobilized Yeast Cells: II. Semicontinuous Fermentation
W. M. Mahmoud, A.-H. M. M. El-Sayed, and R. W. Coughlin

64 A Flow-Cytometric Analysis of Hybridoma Growth and Monoclonal Antibody Production
M. Dalili and D. F. Ollis

74 Glutamine-Limited Batch Hybridoma Growth and Antibody Production: Experiment and Model
M. Dalili, G. D. Sayles, and D. F. Ollis

83 Comparative Study of Production of Dextransucrase and Dextran by Cells of *Leuconostoc mesenteroides* Immobilized on Celite and in Calcium Alginate Beads
A.-H. M. M. El-Sayed, W. M. Mahmoud, and R. W. Coughlin

92 Kinetics of CO_2 Hydration in Fermentors: pH and Pressure Effects
P. K. Yegneswaran, M. R. Gray, and B. C. Thompson

Communications to the Editor

97 Wall-Growth Hollow-Fiber Reactor for Tissue Culture: I. Preliminary Experiments
D. Patankar and T. Oolman

104 Wall-Growth Hollow-Fiber Reactor for Tissue Culture: II. A Theoretical Model
D. Patankar and T. Oolman

June 20, 1990

109 Hydrodynamics and Mass Transfer in Two-Phase Aqueous Extraction Using Spray Columns
S. B. Sawant, S. K. Sikdar, and J. B. Joshi

116 Ethanol Extraction by Supported Liquid Membrane During Fermentation
P. Christen, M. Minier, and H. Renon

124 A Comparison of Mathematical Model Predictions to Experimental Measurements for Growth and Recombinant Protein Production in Induced Cultures of *Escherichia coli*
M. J. Betenbaugh and P. Dhurjati

135 Enzymatic Catalysis in Microemulsions: Enzyme Reuse and Product Recovery
K. M. Larsson, P. Aldercreutz, B. Mattiasson, and U. Olsson

142 A Bioenergetic Model of a Mixed Production Fermentation
H. A. Haughney and E. B. Nauman

149 Sorbitol Production in Charged Membrane Bioreactor with Coenzyme Regeneration System: I. Selective Retainment of NADP(H) in a Continuous Reaction
M. Ikemi, N. Koizumi, and Y. Ishimatsu

155 Sorbitol Production in Charged Membrane Bioreactor with Coenzyme Regeneration System: II. Theoretical Analysis of a Continuous Reaction with Retained and Regenerated NADPH
M. Ikemi, Y. Ishimatsu, and S. Kise

166 Effect of Regulatory Mechanism on Hyperbolic Reaction Network Properties
R.A. Majewski and M.M. Domach

179 Chemostat-Cultivated *Escherichia coli* at High Dilution Rate: Multiple Steady States and Drift
R.A. Majewski and M.M. Domach

191 Cell Volume Measurement as an Estimation of Mammalian Cell Biomass
K.K. Frame and W.S. Hu

198 Kinetic Analysis of the Growth of *Chlorella vulgaris*
M. Iehana

207 Characterization of an Immobilized Cell, Trickle Bed Reactor during Long Term Butanol (ABE) Fermentation
C.-H. Park, M.R. Okos, and P.C. Wankat

July 1990

219 Macroporous and Hydrophilic Polymer Resins Modified with Isothiocyanate Groups for Immobilization of Enzymes
M. Hasegawa, H. Kitano, R. Nishida, and T. Kobashi

224 The pH-Auxostat as a Tool for Studying Microbial Dynamics in Continuous Fermentation
G. Larsson, S.-O. Enfors, and H. Pham

233 Analysis of pBR322 Replication Kinetics and Its Dependency on Growth Rate
B.G. Kim and M.L. Shuler

243 Product Deactivation in Recombinant *Streptomyces*
A.R. Gardner and T.W. Cadman

252 Biosurfactant Yields and Nutrient Consumption of *Pseudomonas fluoerescens* 378 Studied in a Microcomputer Controlled Multifermentation System
A. Persson, G. Molin, N. Andersson, and J. Sjöholm

256 Effect of β-Cyclodextrin on Production of L-Phenylacetyl Carbinol by Immobilized Cells of *Saccharomyces cerevisiae*
W.M. Mahmoud, A.-H.M.M. El-Sayed, and R.W. Coughlin

263 Production of Essential L-Branched-Chain Amino Acids in Bioreactors Containing Artificial Cells Immobilized Multienzyme Systems and Dextran–NAD^+
K.F. Gu and T.M.S. Chang

270 Enzymatic Synthesis of Alkyds
S. Geresh and Y. Gilboa

275 Inhibition of *Trichoderma reesei* Cellulase by Sugars and Solvents
M. Holtzapple, M. Cognata, Y. Shu, and C. Hendrickson

288 Prediction of the Profiles of the Elution Bands of Proteins in Preparative Liquid Chromatography
A. Katti, J.-X. Huang, and G. Guiochon

293 Use of Novel Immobilized β-Galactosidase Reactor to Hydrolyze the Lactose Constituent of Skim Milk
A. P. Bakken, C. G. Hill, Jr., and C. H. Amundson

310 Chitin/Chitosan Transformation by Thermo-Mechano-Chemical Treatment Including Characterization by Enzymatic Depolymerization
A. Pelletier, I. Lemire, J. Sygusch, E. Chornet, and R. P. Overend

Communication to the Editor

316 Reversible Removal and Hydrodynamic Phenomena in CHO Microcarrier Cultures
M. S. Croughan and D. I. C. Wang

August 1990

August 5, 1990

323 Indirect Electrochemical Reduction of Methemoglobin: Design of the Process
P. Labrune, A. Bergel, and M. Comtat

330 High Cell Density Culture of a Recombinant *Escherichia coli* Producing Penicillin Acylase in a Membrane Cell Recycle Fermentor
Y. L. Lee and H. N. Chang

338 Production of Dextransucrase by *Leuconostoc mesenteroides* Immobilized in Calcium-Alginate Beads: I. Batch and Fed-Batch Fermentations
A.-H. M. M. El-Sayed, W. M. Mahmoud, and R. W. Coughlin

346 Production of Dextransucrase and Dextran by *Leuconostoc mesenteroides* Immobilized in Calcium-Alginate Beads: II. Semicontinuous Fed-Batch Fermentations
A.-H. M. M. El-Sayed, W. M. Mahmoud, and R. W. Coughlin

354 A New Biochemical Engineering Approach to the Fractional Precipitation of Proteins
P. Richardson, M. Hoare, and P. Dunnill

367 Countercurrent Multistage Fluidized Bed Reactor for Immobilized Biocatalysts: I. Modeling and Simulation
H. J. Vos, D. J. Groen, J. J. M. Potters, and K. Ch. A. M. Luyben

377 Countercurrent Multistage Fluidized Bed Reactor for Immobilized Biocatalysts: II. Operation of a Laboratory-Scale Reactor
H. J. Vos, M. Zomerdijk, D. J. Groen, and K. Ch. A. M. Luyben

387 Countercurrent Multistage Fluidized Bed Reactor for Immobilized Biocatalysts: III. Hydrodynamic Aspects
H. J. Vos, C. van Houwelingen, M. Zomerdijk, and K. Ch. A. M. Luyben

397 The Separation of Affinity Flocculated Yeast Cell Debris Using a Pilot-Plant Scroll Decanter Centrifuge
A. C. Bentham, J. Bonnerjea, C. B. Orsborn, P. N. Ward, and M. Hoare

402 Mechanisms for Biopolymer Accumulation in Immobilized *Acinetobacter calcoaceticus* System
S.-D. Wang and D. I. C. Wang

411 Immobilization of the Serine Protease from *Thermomonospora fusca* YX on Porous Glass
T. W. Gusek, M. T. Tyn, and J. E. Kinsella

417 Growing *Saccharomyces cerevisiae* in Calcium-Alginate Beads Induces Cell Alterations which Accelerate Glucose Conversion to Ethanol
J.L. Galazzo and J.E. Bailey

Communications to the Editor

427 Kinetics of Methanogenesis from Whey Permeate in Packed Bed Immobilized Cells Bioreactor
S.-T. Yang and M. Guo

August 20, 1990

437 Dynamic Model Development for a Continuous Culture of *Saccharomyces cerevisiae*
D.G. O'Neil and G. Lyberatos

446 Adsorption of Cellulase from *Trichoderma reesei* on Cellulose and Lignacious Residue in Wood Pretreated by Dilute Sulfuric Acid with Explosive Decompression
H. Ooshima, D.S. Burns, and A.O. Converse

453 Involvement of a Cell Size Control Mechanism in the Induction and Maintenance of Oscillations in Continuous Cultures of Budding Yeast
E. Martegani, D. Porro, B.M. Ramzi, and L. Alberghina

460 Enhanced Shikonin Production from *Lithospermum erythrorhizon* by In Situ Extraction and Calcium Alginate Immobilization
D.J. Kim and H.N. Chang

467 Recovery of a Charged-Fusion Protein from Cell Extracts by Polyelectrolyte Precipitation
D.E. Parker, C.E. Glatz, C.F. Ford, S.M. Gendel, I. Suominen, and M.A. Rougvie

476 Damage Mechanisms of Suspended Animal Cells in Agitated Bioreactors with and Without Bubble Entrainment
K.T. Kumas and E.T. Papoutsakis

484 Partitioning of Host and Recombinant Cells in Aqueous Two-Phase Polymer Systems
C. LaMarca, A.M. Lenhof, and P. Dhurjati

493 Effect of Cell Growth Rate on the Performance of a Two-Stage Continuous Culture System in a Recombinant *Escherichia coli* Fermentation
S. Park, D.D.Y. Ryu, and J.Y. Kim

506 Trypsin Purification by Affinity Binding to Small Unilamellar Liposomes
J.D. Powers, P.K. Kilpatrick, and R.G. Carbonell

520 Theoretical Development and Performance Evaluation for Extractive Fermentation Using Multiple Extractants
Z. Shi, K. Shimizu, S. Iijima, T. Morisue, and T. Kobayashi

Communications to the Editor

530 Effect of Liquid Properties and Flow on Liquid Film Mass Transfer Coefficient in Silicone Membrane Oxygenation
E.K. Lee, L. Huang, and Y.H. Lee

534 Some Comments on Respiratory Quotient (RQ) Determination for the Analysis of Exit Gas from a Fermentor
S. Aiba and H. Furuse

539 Development of Computerized Feedback Control for the Continuous Phasing of *Bacillus subtilis*
J.D. Sheppard and D.G. Cooper

September 1990

September 1990

547 A Stochastic Model to Simulate the Growth of Anchorage Dependent Cells on Flat Surfaces
J.H.F. Lim and G.A. Davies

563 Transient Shear Stresses on a Suspension Cell in Turbulence
R.S. Cherry and K.-Y. Kwon

572 Simultaneous Ultrafiltration and Affinity Sorptive Separation of Proteins in a Hollow Fiber Membrane Module
R. Molinari, J.L. Torres, A.S. Michaels, P.K. Kilpatrick, and R.G. Carbonell

581 A Structured, Segregated Model for Genetically Modified *Escherichia coli* Cells and Its Use for Prediction of Plasmid Stability
B.G. Kim and M.L. Shuler

593 Lipoprotein Lipase Immobilization onto Polyacrolein Microspheres
T. Hayashi and Y. Ikada

601 Protein–Protein Interaction in Low Water Organic Media
H.F. Gaertner and A.J. Puigserver

608 Optimization of a Pellicular Biocatalyst for Penicillin G Production by *Penicillum chrysogenum*
W.P. Flanagan, H.E. Klei, D.W. Sundstrom, and C.W. Lawton

617 Continuous Hydrolysis of Oil by Immobilized Lipase in a Countercurrent Reactor
Y. Kosugi, H. Tanaka, and N. Tomizuka

623 Continuous Production of Prourokinase in Feed Harvest and Perfusion Cultures
A. Wagner, A. Marc, J.M. Engasser, S. Villermaux, and A. Einsele

630 Effects of Cell Density and Glucose and Glutamine Levels on the Respiration Rates of Hybridoma Cells
D. Wohlpart, D. Kirwan, and J. Gainer

636 On-Line Monitoring of the Viscosity in Dextran Fermentation Using Piezoelectric Quartz Crystal
H. Endo, K. Sode, I. Karube, and H. Muramatsu

642 Influence of Whey Protein on Continuous Acidogenic Degradation of Lactose
W.S. Kisaalita, K.V. Lo, and K.L. Pinder

Communication to the Editor

647 On-line Fermentation Monitoring Using Flow Injection Analysis
F. Valero, J. Lafuente, M. Poch, C. Solà, A.N. Araujo, and J.L.F.C. Lima

October 1990

October 5, 1990

653 The Permeability of EUDRAGIT RL and HEMA-MMA Microcapsules to Glucose and Inulin
J.A. Douglas and M.V. Sefton

665 Stability and Reaction Characteristics of Reverse-Phase Evaporation Vesicles (REVs) as Enzyme Containers
E. Sada, S. Katoh, M. Terashima, H. Shiraga, and Y. Miura

672 Polarographic Measurement of Oxygen Uptake Using Lipoxygenase in Reverse Micelles
A. Hochkoeppler and S. Palmieri

678 Calorimetric Control of Fed-Batch Fermentations
T. W. Randolph, I. W. Marison, D. E. Martens, and U. von Stockar

685 Effect of Metal Ion Concentration on a Biological Reactor
P. G. Ibbotson, P. L. Spedding, and M. S. Otterburn

694 A Structured Kinetic Model for *Zymomonas mobilis* ATCC10988
U. Veeramallu and P. Agrawal

705 Modeling of Immobilized Cell Reactor for Propionic Acid Fermentation
J. P. S. G. Crespo, J. S. Almeida, M. J. Moura, and M. J. T. Carrondo

717 Balanced Nutrient Fortification Enables High-Density Hybridoma Cell Culture in Batch Culture
E.-C. Jo, H.-J. Park, J.-M. Park, and K.-H. Kim

723 Control of an Affinity Purification Procedure Using a Thermal Biosensor
L. Flygare, P.-O. Larsson, and B. Danielsson

727 Population Dynamics of a Recombinant Culture in a Chemostat under Prolonged Cultivation
A. E. Weber and K.-Y. San

737 Complications Encountered Using Cibacron Blue F3G-A as a Ligand for Affinity Precipitation of Lactate Dehydrogenase
J. E. Morris and R. R. Fisher

744 A New Biosensor for Specific Determination of Glucose or Fructose Using an Oxidoreductase of *Zymomonas mobilis*
J.-K. Park and H.-S. Kim

750 A Balanced DO-Stat and Its Application to the Control of Acetic Acid Excretion by Recombinant *Escherichia coli*
K. Konstantinov, M. Kishimoto, T. Seki, and T. Yoshida

Communications to the Editor

759 Relationship Between Oxygen Consumption Rate and Cellular Activity of Mammalian Cells Cultured in Serum-Free Media
K. Yamada, S. Furushou, T. Sugahara, S. Shirahata, and H. Murakami

October 20, 1990

763 The Large-Scale Immobilization of Penicillium chrysogenum: Batch and Continuous Operation in an Air-Lift Reactor
T. Keshavarz, R. Eglin, E. Walker, C. Bucke, G. Holt, A. T. Bull, and M. D. Lilly

771 A Viscous Pump Bioreactor
S. J. Kleis, S. Schreck, and R. M. Nerem

778 Stimulation of Exopolysaccharide Production in the Fungus *Acremonium persicinum* with Fatty Acids
S. J. Stasinopoulos and R. J. Seviour

783 Deactivation of Catalase by Hydrogen Peroxide
P. T. Vasudevan and R. H. Weiland

790 Continuous Production of Maltotetraose Using a Dual Immobilized Enzyme System of Maltotetraose-Forming Amylase and Pullulanase
T. Kimura, M. Ogata, H. Kobayashi, M. Yoshida, K. Oishi, and T. Nakakuki

797 Kinetic Studies and Unstructured Models of Lymphocyte Metabolism in Fed-Batch Culture
G.A. Truskey, D.P. Nicolakis, D. DiMasi, A. Haberman, and R.W. Swartz

808 Changes in the Activity of the General Amino Acid Permease from *Saccharomyces cerevisiae* var. *ellipsoideus* during Fermentation
R. Iglesias, J.M. Ferreras, F.J. Arias, R. Muñoz, and T. Girbés

811 Glucose Oxidase Immobilized Polyethylene-g-Acrylic Acid Membrane for Glucose Oxidase Sensor
G.-H. Hsiue and C.-C. Wang

816 The Process Utility of Thermotolerant Methylotrophic Bacteria: I. An Evaluation in Chemostat Culture
N. Al-Awadhi, T. Egli, G. Hamer, and C.A. Mason

821 The Process Utility of Thermotolerant Methylotrophic Bacteria: II. An Evaluation of Transient Responses
N. Al-Awadhi, T. Egli, G. Hamer, and C.A. Mason

826 Ethanol Production in a Microporous Hollow-Fiber-Based Extractive Fermentor with Immobilized Yeast
W. Kang, R. Shukla, and K.K. Sirkar

834 Enzymatic Production of Hydrogen Peroxide and Acetaldehyde in a Pressure Reactor
L.P. Nelles, J.A. Arnold, and D.S. Willman

839 Cell Cycle- and Growth Phase-Dependent Variations in Size Distribution, Antibody Productivity, and Oxygen Demand in Hybridoma Cultures
O.T. Ramírez and R. Mutharasan

849 Ethanol Production from Starch in a Pervaporation Membrane Bioreactor Using *Clostridium thermohydrosulfuricum*
Y. Mori and T. Inaba

854 Micromixing in Fermentors: Metabolic Changes in *Saccharomyces cerevisiae* and Their Relationship to Fluid Turbulence
E.H. Dunlop and S.J. Ye

November 1990

November 1990

865 Depression of Protein Synthetic Capacity Due to Cloned-Gene Expression in *E. coli*
T. D. Wood and S.W. Peretti

879 A Hollow-Fiber Reactor Design for NMR Studies of Microbial Cells
C.A. Briasco, D.A. Ross, and C.R. Robertson

887 Diffusional Limitations of Immobilized *Escherichia coli* in Hollow-Fiber Reactors: Influence on ^{31}P NMR Spectroscopy
C.A. Briasco, S.F. Karel, and C.R. Robertson

902 Mammalian Cell and Protein Distributions in Ultrafiltration Hollow-Fiber Bioreactors
J.M. Piret and C.L. Cooney

911 The Role of the Plasma Membrane Fluidity on the Shear Sensitivity of Hybridomas Grown under Hydrodynamic Stress
O.T. Ramirez and R. Mutharsan

921 The Use of a Metabolically Structured Model in the Study of Growth, Nitrification, and Denitrification by *Thiosphaera pantotropha*
S.G.M. Geraats, C.M. Hooijmans, E.W.J. van Neil, L.A. Robertson, J.J. Heijnen, and K.Ch.A.M. Luyben

931 Determination of Growth and Coupled Nitrification/Denitrification by Immobilized *Thiosphaera pantotropha* Using Measurement and Modeling of Oxygen Profiles
C.M. Hooijmans, S.G.M. Geraats, E.W. J. van Neil, L.A. Robertson, J.J. Heijnen, and K.Ch.A.M. Luyben

940 Hydrodynamic Model for Liquid-Impelled Loop Reactors
H.M. van Sonsbeek, R.E.M. Verdurmen, P. Verlaan, and J. Tramper

947 Foam Fractionation of Globular Proteins
L. Brown, G. Narsimhan, and P.C. Wankat

Communications to the Editor

960 Analysis of Cloned SUC2 Gene Expression in Continuous Culture of Recombinant *Saccharomyces cerevisiae*
J.K. Jang, Y. R. Pyun, P.K. Shin, and J.-H. Seo

965 A Method to Estimate the Efficiency of Oxidative Phosphorylation and Biomass Yield from ATP of a Facultative Anaerobe in Continuous Culture
A.-P. Zeng, A. Ross, and W.D. Deckwer

970 Aerosol Release from Aerated Broths
W. Pilacinski, M.J. Pan, K.W. Szewczyk, M. Lehtimaki, and K. Willeke

December 1990

December 5, 1990

975 The Long-Term Effects of Ethanol on Immobilized Cell Reactor Performance Using *K. Fragilis*
C. Chen, M.C. Dale, and M.R. Okos

983 Cell Growth and Death Rates as Factors in the Long-Term Performance, Modeling, and Design of Immobilized Cell Reactors
M.C. Dale, C. Chen, and M.R. Okos

993 Minimal Nutritional Requirements for Immobilized Yeast
C. Chen, M.C. Dale, and M.R. Okos

1002 Enhanced Enzymatic Activity and Stability of Trypsin by Reductive Alkylation in Solid Phase
R.F. Tsuji

1006 Physiological, Biochemical, and Mathematical Studies of Micro-Aerobic, Continuous Ethanol Fermentation by *Saccharomyces cerevisiae.* I: Hysteresis, Oscillations, and Maximum Specific Ethanol Productivities in Chemostat Culture
R. Grosz and G. Stephanopoulos

1020 Physiological, Biochemical, and Mathematical Studies of Micro-Aerobic Continuous Ethanol Fermentation by *Saccharomyces cerevisiae.* II: Intracellular Metabolite and Enzyme Assays at Steady State Chemostat Cultures
R. Grosz and G. Stephanopoulos

1030 Physiological, Biochemical, and Mathematical Studies of Micro-Aerobic Continuous Ethanol Fermentation by *Saccharomyces cerevisiae.* III: Mathematical Model of Cellular Energetics and Catabolism
R. Grosz and G. Stephanopoulos

1041 On-Line Prediction of Fermentation Variables Using Neural Networks
J. Thibault, V. Van Breusegem, and A. Chéruy

1049 Immobilization Can Improve the Stability of Hybridoma Antibody Productivity in Serum-Free Media
G. M. Lee and B.O. Palsson

1056 A Completely Automated System for On-Line Monitoring of the Production of a Growth Factor Secreted During Fermentation of *Escherichia coli*
H. Lundström, M. Brobjer, B. Österlöf, and T. Moks

1063 Intramolecular Esterification by Lipase Powder in Microaqueous Benzene: Factors Affecting Activity of Pure Enzyme
T. Yamane, T. Ichiryu, M. Nagata, A. Ueno, and S. Shimizu

1070 Group Contributions for Estimating Standard Gibbs Energies of Formation of Biochemical Compounds in Aqueous Solution
M. L. Mavrovouniotis

December 20, 1990

1083 Characterization of *E. coli* Cell Disintegrates from a Bead Mill and High Pressure Homogenizers
I. Agerkvist and S.-O. Enfors

1090 Investigation of Binding Site Density: Effects on the Interaction Between Cibacron Blue–Dextran Conjugates and Lysozyme
A.G. Mayes, J. D. Moore, R. Eisenthal, and J. Hubble

1097 Analysis of *E. coli phoA-lacZ* Fusion Gene Expression Inserted into a Multicopy Plasmid and Host Cell's Chromosome
P. K. Shin and Jin-Ho Seo

1105 Decrease in Iron Oxidizing Activity of Thiobacillus ferrooxidans Adsorbed on Activated Carbon
T. Kai, T. Takahashi, Y. Shirakawa, and Y. Kawabata

1110 Enhancing Penicillin Fermentations by Increase Oxygen Solubility Through the Addition of *n*-Hexadecane
C. S. Ho, L.-K. Ju, and R. F. Baddour

1119 Computer-Aided Synthesis of Biochemical Pathways
M. L. Mavrovouniotis, G. Stephanopoulos, and G. Stephanopoulos

1133 High-Level Recombinant Protein Production in Bioreactors Using the Baculovirus–Insect Cell Expression System
A.W. Caron, J. Archambault, and B. Massie

1141 Parametric Analysis of the Errors Associated with the Michaelis–Menten Equation
R. F. Brown and M. T. Holtzapple

Communication to the Editor

1151 A Comparison of the Michaelis–Menten and HCH-1 Models
R. F. Brown and M. T. Holtzapple
